Subject: Tecnam Confirmation on P92 Eaglet LSA Equipment

Costruzioni Aeronautiche TECNAM S.r.l, manufacturer of the Tecnam P92 Eaglet LSA aircraft, hereby confirms that the above mentioned a/c, in standard configuration, is approved for VMC operations (Day VFR and Night VFR) and the information reported into the P92 Eaglet LSA POH manual, Section 2.1.20 “*Kinds of Operations*” are an editorial mistake because they are superseded by the subsequent chapters. For the minimum equipment required for Day VFR and Night VFR operations, it is possible to refer to P92 Eaglet LSA POH manual, Section 2.1.21 “*Day VFR*” and Section 2.1.22 “*Night*”.

Contextually, it is hereby declared that the equipment listed below, not strictly required by the ASTM guidance, can be considered as recommended optional equipment:

- First Aid Kit
- Hand-held fire extinguisher
- Emergency hammer

These recommended optional equipment, in accordance with ASTM guidance, don't limit the a/c operations listed above.

With Best Regards,

Fabio Russo
Chief Project R&D and Product Development
